## CAREER OBJECTIVE

I am looking to gain experience and learn in a professional environment, while contributing with my work to fulfill the objectives of the institution. I am interested in being part of an environment where I can learn and experience the development of teamwork and group cooperation while learning major concepts that will help me professionally in the long run. I think that this opportunity will help me foster skills such as company, responsibility and cooperation in the field of work and in personal training, while also having the opportunity to learn and visualize myself career wise in the IT area.

## PROJECTS

[\[LinkFe\]](#) [\[LinkBe\]](#) **E-commerce Website**- Full Stack Project

**Tech Stack:** React.js, Express.js, MongoDB, axios, antd, typescript, tailwindcss, react-hook-form, yup, sooner, redux-toolkit, react-router

- Implemented secure user authentication and authorization with role-based access control (Admin & Customer).
- Built a comprehensive product catalog with search, filter, and category management features.
- Integrated shopping cart and checkout system for smooth purchase flow.
- Developed admin functionalities for adding, editing, or removing products, and managing inventory and orders.
- Implemented payment gateway integration for secure and real-time order processing.

[\[Link\]](#) **Mystery Message Website** - Full Stack Project

**Tech Stack:** Next.js, MongoDB, express, next-auth, react-hook-form, zod, radix-ui, axios, lucide-react

- User Authentication with NextAuth
- Anonymous Messaging system for honest feedback
- Toggle Option to enable/disable receiving messages
- Shareable unique links for collecting feedback

[\[Link\]](#) **Leetlab** - Full Stack Project

**Tech Stack:** react, express, mongodb, judge0, daisyui, react-hook-form, lucide-react, axios, react-router-dom, tailwindcss, zod, zustand

- Built LeetLab, a full-stack web platform for practicing DSA problems.
- Developed using React and Node.js with secure user authentication and role management.
- Integrated Judge0 API for multi-language code submission and automated code evaluation.
- Provided instant feedback and performance insights, enhancing users' problem-solving experience.
